sparqs

Keep, change, remove and add activity

Consider the **'tailored'** slides / handbook showcased by Adam Smith College earlier on today. In terms of content, structure, design, format and accessibility, what would you **keep, change, remove** or **add**, to adapt them according to your own institutions mechanisms for student engagement and representation and your reps information requirements?

Timeline for developing course rep training?

Action planning

sparqs

Institution specific action planning activity

Now create an action plan that demonstrates how you would approach taking your ideas for tailoring the training and handbook forward within your own institution / student association. Your plan should:

- detail key activities to be undertaken at each stage
- identify stakeholders / partners who need to be involved at each stage
- consider any anticipated challenges along the way and how these can be overcome
- list the resources that will be required and
- give a timeline of activities
